Functions vs. Relations

Relation:

two variables, where changing one affects the other.

km driven vs. Cost

$$x^2 + y^2 = 36$$

$$C = 3.50 + 0.50k$$

Function:

A relation where every x -value has only one y -value

Vertical Line Test:

up and down

If a vertical line touches a graph more than once for ANY

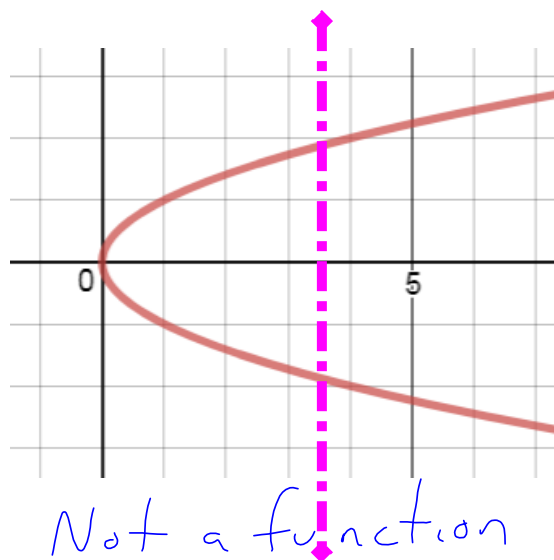

x -value then you do not have a function

Function or Relation?

Function

Not a function

Function

Relation

Domain and Range

Domain: All x -values in a Relationship

Range: All possible y -values in a relationship.

Determine the domain and range for the following:

X	Y
2	7
3	10
4	13
7	22

$D \rightarrow \{2, 3, 4, 7\}$

$R \rightarrow \{7, 10, 13, 22\}$

$D \rightarrow \{x \in \mathbb{R}\}$

$R \rightarrow \{y \in \mathbb{R}\}$

$y = \frac{1}{x+3}$ *"such that"*

$D \rightarrow \{x \in \mathbb{R} \mid x \neq -3\}$

$R \rightarrow \{y \in \mathbb{R} \mid y \neq 0\}$

$x^2 + y^2 = 25$

$\{x \in \mathbb{R} \mid -5 \leq x \leq 5\}$

$\{y \in \mathbb{R} \mid -5 \leq y \leq 5\}$
