

How long will it take to mow the lawn?

- > What could we do to find how long it will take to mow the lawn?
- > What information will be necessary to help us decide?

The Answer

Area of
grass
1602
= 1661 ft²
1538
1601
Ⓢ 1609

$39 \times 1.5 = 58.5$
 $\frac{1661}{58.5} \times 19.27$

$$\begin{aligned} A &= \pi r^2 \\ &= \pi (4)^2 \\ &= \pi (16) \\ &= 16\pi \end{aligned}$$

Suppose you were going to edge the lawn with a whipper snipper.

How far do you have to walk to do this?

Determine the perimeter and area of the figure below.
